Skilled, reliable & partnership focused

ABOUT US

At Anderson Construction, the dedicated construction professionals in our team design, project-manage and construct all types of structures to our client's specifications.

For more than two decades, we've been the go-to contractor for delivering a full suite of commercial and industrial warehouses, workshops, factories, agricultural buildings, hangars and community buildings for our clients in the mining, domestic, commercial, government and agricultural sectors.

Our construction solutions are robust, practical and safe - built to do the job they're supposed to. We design our buildings with durability, reliability and functionality in mind.

Are you under tight project constraints? We've got you covered! Our full-service capability delivers custom outcomes for our clients and allows us to successfully manage projects of any size from start to finish, including remote mining sites.

We specialise in:

- Factories
- Warehouses
- Workshops
- Agricultural buildings
- Covered arenas
- Hangars
- Mining buildings
- Industrial buildings
- Community buildings

OUR NAME IS OUR REPUTATION

At Anderson Construction, our word is our bond. We're honest, reliable and prompt. Integrity is fundamental to our company culture. We use quality building products, provide expert quotes, and deliver genuine personalised service. In short: we deliver innovative construction solutions for our clients across Western Australia.

Our family name is our brand, so when you call or drop by Anderson Construction to discuss your building needs, you'll deal directly with either one of our owners, James or John.

Solutions based & purpose-built

INDUSTRIES WE WORK IN

INDUSTRIAL

We deliver an extensive range of industrial construction services, and our building range is known for its superior engineering and unique design features. We employ modern industrial construction solutions to deliver sturdy, safe and robust industrial buildings that are fit for purpose.

AGRICULTURE

We meticulously design and engineer all of our agricultural shed and warehousing structures to endure the harshest conditions across Western Australia. As the state's agricultural construction specialist, we manage projects of all sizes.

MINING

We have a proven track record of working with some of WA's most prestigious mining operators. We understand the complexities and importance of site consideration and ensure our construction are engineered to withstand site conditions without compromising on functionality.

COMMERCIAL

We design our commercial buildings and purpose-built warehouses to suit your specific needs. Our commercial buildings ensure a user-friendly layout and functionality. We use premium materials so our buildings are strong and durable.

Proactive, innovative & quality... always

OUR EXPERT CAPABILITIES

End-to-end and detail-orientated for superior outcomes

DESIGN

It's in the details. Our years of expertise have taught us what to look out for. We deliver innovative designs, considering each aspect pro-actively. This ensures a smooth project from start to finish and beyond.

PLAN

We place major emphasis on the planning phase - we do it once and we do right. We collaborate with you to deliver a customised, detailed and practical building plan that meets your requirements.

PROCURE

We have a well-established supply chain, utilising local manufacturers and wholesalers. We also have the ability to source from offshore with our selected import partners.

CONSTRUCT

We take care of everything during the construction phase. We keep you up to date with regular progress reports as your new building takes shape. Proactive and prompt, we deliver on time and to spec.

HSE

Our modern construction solutions integrate the best technology to boost efficiency, lower production costs and guarantee the highest quality. As a certified company, we guarantee compliance while working to Australian standards.

Some of our recent projects

A BRAND-NEW MULTI-PURPOSE FACILITY FOR BAHEN CHOCOLATE

We partnered with one of WA's premier chocolate manufacturers to deliver a brand-new retail store and manufacturing facility. This unique solution optimises both sides of their business, so they work together perfectly.

"They met our expectations and then some! They always deliver on what they say they'll do. I'd recommend them to anyone looking for quality building solutions. It's a combination of everything we've talked about – pricing, exceptional communication and a can-do attitude to solving problems. We're extremely happy with the end result."

- Mark, Bahen Chocolate.

COMMERCIAL SUPPLIES WAREHOUSE PURPOSE-BUILT FOR KERAMOS

Expanding its operations, commercial supplies company Keramos needed an extensive warehouse space built in the heart of the WA mining belt. The team at Anderson Construction delivered an 18x32m concrete tilt-panel warehouse for storage.

"They were in communication with us throughout the project, which took from March to July last year to complete. From tender to sign-off, they were with us every step of the way. We're really happy with the way they went about things." - Graeme Dean, Keramos.

LARGE, HEAVY VEHICLE WORKSHOP FOR MACA

Mining and civil contracting company MACA approached us in need of a heavy vehicle workshop at the Karlawinda mine site near Newman in WA. Their work includes drill and blast, load and haul, provision and maintenance of all plant equipment - which meant they needed a building that could handle the heavy workload.

"I haven't worked with a team like this before, that just gets in and gets the job done. Seeing John on the tools, taking care of it himself, was refreshing. And it didn't stop there. Almost twelve months to the day after it was built, a storm ripped one of the doors off. They replaced it under warranty, no questions asked. I wasn't expecting that." - Andy, MACA.
